

LISTING OF CLAIMS:

The following listing of claims will replace all prior versions and listings of claims in the application.

Please **add new** claims 4-20.

1. (Original) A method, comprising:

receiving a telephone call having routing information from an originating party;

routing the telephone call to a terminating party based on the routing information;

determining an identity of the terminating party;

determining targeted marketing material based on the identity of the terminating party; and

providing the targeted marketing material to the originating party.

2. (Original) The method of claim 1, wherein the telephone call is a toll-free telephone call.

3. (Original) An apparatus, comprising:

a processor; and

a memory in communication with the processor, the memory for storing a plurality of processing instructions directing the processor to:

receive a telephone call having routing information from an originating party;

route the telephone call to a terminating party based on the routing information;

determine an identity of the terminating party;

determine targeted marketing material based on the identity of the terminating party; and

provide the targeted marketing material to the originating party.

4. (New) The method of claim 1, further comprising:
providing targeted marketing materials to the terminating party.
5. (New) The method of claim 1, further comprising:
identifying the originating party.
6. (New) The method of claim 5, further comprising:
providing targeted marketing materials to the originating party based on characteristics associated with the identity of the originating party.
7. (New) The method of claim 5, further comprising:
providing targeted marketing materials to the targeting party based on characteristics associated with the identity of the originating party.
8. (New) A method comprising:
receiving a VOIP transaction originated from a computer or wireless device which has routing information to a telephone or IP number;
routing the transaction to that telephone number or IP number;
determining the identity or profile of the terminating party;
determining targeted marketing materials based on the identity of the terminating party; and
providing targeted marketing materials to the originating party.
9. (New) The method of claim 8, further comprising:
providing targeted marketing materials to the terminating party.
10. (New) The method of claim 8, further comprising:
identifying the originating party.
11. (New) The method of claim 10, further comprising:
providing targeted marketing materials to the originating party based on characteristics associated with the identity of the originating party.
12. (New) The method of claim 10, further comprising:
providing targeted marketing materials to the targeting party based on characteristics associated with the identity of the originating party.
13. (New) The method in claim 10, wherein the VOIP transaction is a telephone call.
14. (New) The method in claim 10, wherein the VOIP transaction is a video call.

15. (New) The method in claim 10, wherein the VOIP transaction is a web call.
16. (New) An apparatus, comprising:
- a processor; and
 - a memory in communication with the processor, the memory for storing a plurality of processing instructions directing the processor to:
 - receive a VOIP transaction originated from a computer which has routing information to a telephone or IP number;
 - route the transaction to that telephone number;
 - determine the identity or profile of the terminating party; and
 - determine targeted marketing materials based on the identity of the terminating party; and
 - provide targeted marketing materials to the originating party.
17. (New) A method comprising of:
- receiving a VOIP transaction from a user computer or wireless device;
 - identifying cookies or web site favorites stored on that computer;
 - routing the transaction requested by the user; and
 - displaying relevant marketing materials to user while the transaction is in place.
18. (New) A method comprising of :
- receiving a VOIP transaction from a user;
 - identifying a user-specific characteristic associated with a user's IP address associated with a computer or wireless device ID;
 - routing the VOIP transaction to the appropriate terminating party; and
 - displaying marketing information to the user based on the user-specific characteristic.
19. (New) The method of claim 18, further comprising:
- identifying additional user information based on the user-specific characteristic;
 - requesting an advertisement from an advertising listing based on the additional user information; and
 - preparing the advertisement for display as the marketing information.

20. (New) The method of claim 19, wherein the marketing information is displayed on a cellular phone display.
